ABHISHEK ABHIGYANAM – Associate Software Engineer
Noida, Uttar Pradesh | +91 7667409663 | a.abhigyanam@gmail.com | GitHub | LinkedIn | LeetCode

PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer with expertise in Python, JavaScript, MERN stack, and Owl.js. Proficient in building enterprise-grade applications, REST APIs, data pipelines, and cloud-based workflows on Azure (Data Lake, Synapse, DevOps). Skilled in SQL/NoSQL databases, ETL orchestration, and CI/CD deployments. Experienced in Agile, cross-functional teams, delivering high-quality, production-ready software aligned with complex business and analytics requirements.

WORK EXPERIENCE

Webkul Software Pvt Ltd | Associate Software Engineer *August 2024 – Present*

- Developed Project Gantt Native and Manufacturing Gantt Native modules, improving project and production planning within Odoo; Project Gantt Native achieved 59+ sales on the Odoo App Store.
- Implemented Stripe Payment Terminal and Linkly Payment Terminal integrations for invoice payments in Odoo, enabling secure and seamless financial transactions.
- Designed and delivered a ZPL Label Designer to support customized label printing requirements.
- Performed multiple client-specific customizations, such as adding notification sounds, search features, and Nafath verification during account creation, ensuring usability and compliance.
- Optimized performance and maintained Odoo applications by debugging, troubleshooting, and refining functionality for scalability and efficiency.

TECHNICAL SKILLS :

Python, JavaScript, React.js, Node.js, Express.js, Owl.js, SQL/NoSQL (PostgreSQL, MongoDB), Docker, Git, REST APIs, CI/CD

PROJECTS

FinanceGuard – Intelligent MERN Dashboard with Machine Learning (MERN Stack) Github Repository : Link

- Developed a full-stack finance dashboard using the MERN stack (MongoDB, Express.js, React, Node.js) integrated with Machine Learning (ML) for financial predictions.
- Implemented interactive data visualizations and real-time analytics, enhancing user engagement and decision-making.
- Employed RESTful APIs for seamless data integration and communication between the frontend and backend.
- Deployed the application on Vercel, ensuring scalability and performance in a cloud environment.

Library Management System (MERN Stack) Github Repository: Frontend, Backend

- Engineered a scalable web application using MongoDB, Express.js, React.js, and Node.js (MERN) to manage library operations.
- Designed modules for book tracking, inventory control, and user management, enhancing operational efficiency and usability.
- Implemented optimized data storage, retrieval, and search queries in MongoDB, improving performance for large datasets.

EDUCATION

- **B.Tech.,** Computer Science and Engineering – Bhagalpur College of Engineering | 2019–2023 | CGPA: 7.82
- **Senior Secondary (12th, PCM) –** Langat Singh College | 2016–2018 | 65.6%
- **Secondary (10th) –** N K High School | 2016 | 76.2%

CERTIFICATIONS :

- Python Programming
- Cisco Networking Essentials
- Web Development
- Ethical Hacking
